

GARY'S STORY

Almost 3 decades ago, Gary Loomis founded G•Loomis and quickly attracted the attention and admiration of the world's most discerning anglers. Throughout the evolution of carbon fiber rod making Gary distinguished himself as the Master. Using leading edge technology and engineering, he designed tools that have defined High Performance in rods.

After selling G•Loomis, in 1997, Gary dedicated his efforts to protecting & rehabilitating the fisheries of the Pacific Northwest. His devotion to the fishery helped establish Fish First (www.fishfirst.org), where he serves as President, and the coastal Conservation Association Pacific Northwest (www.ccapnw.org), where he serves as the Chairman for Washington State.

Although Gary is no longer affiliated with G•Loomis, his desire to "build the best rods available" remains. He has agreed to share his unparalleled design skills and understanding of modern technology and materials with Temple Fork Outfitters to develop a new generation of Affordable High Performance rods. Gary is fully committed to increasing participation in fishing and protecting our natural resources for future generations. He believes that TFO's Affordable – High Performance approach forms a great base for this growth.

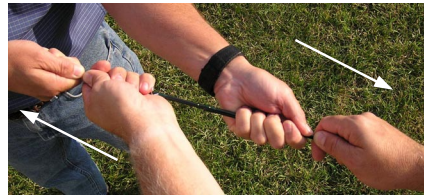

Working with TFO allows me to put high-quality rods in the hands of potential anglers that otherwise would not have access to this king of gear. It is these new anglers that, through their enjoyment of the sport, will help us protect our threatened fishers. ~ Gary Loomis

Take one (or more) of Gary's TFO rods fishing with you...bend it often and make up your own tales.

CARE & MAINTENANCE OF YOUR TEMPLE FORK OUTFITTERS ROD

CORRECT ROD ASSEMBLY

1. Align the tip and the butt sections so that the guides are offset by 90 degrees and insert the tip of the butt section into the bottom of the tip section.
2. Firmly twist the tip and butt until the sections are tight and the guides are aligned.
3. Check the tightness of the sections by attempting to pull them straight apart without twisting. If the two sections hold then they are tight enough.

Sometimes rods are broken when dismantling. In all cases, keep sections aligned when pulling apart. Sections should come apart with minimum force, just twist and pull apart. Use a piece of rubber to more securely grip each section if required. In stubborn cases use two people. Each holds one section in one hand and the other section in the other hand. Both people twist and pull at the same time.

CORRECT ROD DISASSEMBLY

1. To disassemble, twist sections apart.

CAUTION

Never use the guides as leverage to assemble or disassemble your rod.

TEMPLE FORK OUTFITTERS SPINNING & CASTING ROD LIMITED LIFETIME WARRANTY, CANADA

Temple Fork Outfitters Spinning and Casting Rod Limited Lifetime Warranty is for the life of the original registered owner. If your rod fails due to defects in materials or workmanship Temple Fork Outfitters Canada will repair or replace your rod or rod section (tip or butt section) at no cost.

**To activate your warranty, simply go to our website (www.templeforkoutfitters.ca) and fill out the warranty registration form online or fill out the attached form and drop it in the mail to us, don't forget the stamp. Product registration must be completed by the purchaser to activate the warranty. Keep this warranty with your original receipt as you will be required to show proof of purchase from an authorized Canadian Temple Fork Outfitters dealer when claiming a warranty. Temple Fork Outfitters Canada reserves the right to determine the eligibility of the product registration if the registration is delayed by the purchaser for more than three months after the original purchase date.

If you ever have a problem with your rod send it to us here in Calgary. To return a rod for warranty repair or replacement, send the entire rod (insured, we are not responsible for lost shipments) with proof of purchase along with the applicable fee, plus freight and tax to Temple Fork Outfitters Canada care of:

Springbrook Manufacturing
3809—9th Street SE
Calgary, Alberta, Canada T2G 3C7

Please make sure that your broken rod is properly packaged and please include a current daytime phone number & return address; a physical address is better than a P.O. Box. Once we receive your rod, we will inspect the damages. Temple Fork Outfitters Canada will determine, at it's sole discretion, if the rod or rod section failed due to defects in materials or workmanship, if this is the case we will then return your warranty fee along with your repaired or replacement rod or rod section. The whole process should not take more than a week from the time we receive your broken rod. If upon examination, we determine that a broken rod or rod section is not due to a defect in materials or workmanship, Temple Fork Outfitters Canada will process your warranty fee and repair, replace or substitute with the closest comparable model if an exact replacement is no longer available.

Temple Fork Outfitters Canada under the following exceptions has no liability to provide warranty services for the repair or maintenance without charge: deficiency resulting from shipping; damages caused by neglect, misuse or accidental events; human force or assembly; improper maintenance or modifications; normal wear and tear caused by use over time; loss or theft, and is limited to only the rod and its components.

Please note: Your dealer is *not* authorized to offer *over-the-counter no charge replacements* under this warranty so you'll have to send the rod to us if you feel the rod failed due to defects in materials and workmanship. Your dealer, at their discretion, may however replace the broken piece or rod but you will be charged all the applicable fees as shown below. (Fees are subject to change and dealers may call for revised warranty fee pricing.)

In closing, your purchase makes you part of our growing family that most recently has been joined by Gary Loomis. His knowledge, experience, heart and soul exists in each of the TFO Spinning and Casting rods he has designed for us. We ask that you share his passion for the outdoors by helping to protect our valuable fisheries and by helping us get new participants involved in our sport... we welcome you and we thank you for your support.

This warranty supports Temple Fork Outfitters, Canada rods in the TFO Signature Series TiCr²; TFO Professional TLFS, TLFC, TLSHS, TLSHC and TLSHCP series of rods.
